Go to sourceforge also to find older software such as Knoppix 7.6 32 bit or Manjaro 17.0 32 bit or Discreet Linux which blocks bad usb, That's for now.

# Stopping CNO

- CNO or Computer Network Operations is your basic remote radio in Chrome OS, Android, Blackberry OS, Symbian, Mac OS, Windows OS, Anything Microsoft Apple or Google.

# Lower your living standards

- Ignore the propaganda of TV, Radio, and the Newspaper and News Sites that are mainstream. Use only alt-media websites that get censored and get on them with Brave Web Browser or Pale Moon.

- Arch also shows far less security Vulns if searched on exploit-db.

Bam you are fucked.
- If you search [mrfaildeveloper-software-pack](https://github.com/mrfaildeveloper/software-pack) into [github.com](https://github.com) you can find a list of software that I use on older machines that are only 32 bit. I just do not like UEFI or Restricted BIOSes. You sometimes have to modify the bootloader with puppy linux just to get libertarian Linux to boot on the machine.
